1. Qualitative Information on Quarterly Financial Results

(1) Operating Results

Forward-looking statements in the text are based on judgments as of the end of the current quarterly period. GIGAPRIZE CORPORATION (GIGAPRIZE) and its subsidiaries changed their fiscal year-end from March 31 to April 30, the same as our consolidated fiscal year-end. As a result, the consolidated subsidiary in the current fiscal year has an irregular settlement of accounts for the 13 months from April 1, 2023, to April 30, 2024. In the first quarter of the fiscal year under

review, the four months from April 1, 2023, to July 31, 2023, have been included in the consolidated settlement.

For more information on the change in fiscal year-end, see "2.Quarterly Consolidated Financial Statements and Major Notes (3) Notes to Quarterly Consolidated Financial Statements (Changes in the scope of consolidation or the scope of application of the equity method)" of p.13.

Name in use	Official name	Explanation
5G	5th Generation	Abbreviation for 5th Generation Mobile Communications System, which is one of the next generation communications standards
web3	Web3(Web 3.0)	Concept of the next-generation distributed Internet, which enables users to exchange data and content directly with each other without going through a huge platform former
MVNO	Mobile Virtual Network Operator	Virtual mobile operator
Cloud	Cloud Computing	A generic term for a data center or server group in which a system for providing software, etc. to users over a network and data is stored and operated
ΙοΤ	Internet of Things	A system that allows goods to communicate with each other by equipping them with a communication function, thereby enabling automatic recognition and automatic control without human intervention.
MVNE	Mobile Virtual Network Enabler	MVNO support provider
Metaverse	Metaverse	Virtual space that is used over the Internet
AI	Artificial Intelligence	Techniques that use computers to study or conduct human intellectual behavior
TONE Care	TONE Care	One of TONE Laboratory's demonstration test projects An online service that allows customers to promptly provide various health consultations remotely, such as consultations on health concerns and counseling on the overuse of children's smartphones
DX	Digital Transformation	Reforming products, services, business models, etc. by utilizing data and digital technologies
NFT	Non-Fungible Token	Technology that can clarify whether digital content is real, who is the producer, and who is the owner

The official names and explanations of the names used in "Explanation of Operating Results" are as follows.

Our group promotes corporate management with a view to the 10-year plan from 2021 to 2030. In line with this, we are currently promoting management to achieve net sales of 50 billion yen and operating income of 5 billion yen in the three-year medium-term management plan "SiLK VISION 2024" that ends in the current consolidated fiscal year.

In addition, with an eye to the Next Medium-Term Management Plan "SiLK VISION 2027", we will invest our management resources in the mobile revolution, lifestyle revolution, and production revolution domains, which we consider to be growth domains worldwide while contributing to the realization of a sustainable society. In this way, we will aim to expand our business through Exponential Technology "exponentially growing technologies" as "5G/web3 era Platform Maker".

The business operations of each reportable segment are as follows.

<5G Infrastructure Support Business>

In addition to support services for entry into the MVNO business and business support services for ISPs, we promote support services for various business corporations to introduce cloud and IoT, etc. We will also build next-generation networks and data centers to respond to the 5G era. We will strengthen service provision that leverages our cloud infrastructure and deploy services that utilize 5G, and eSIM (embedded SIM), as well as expand services that combine these and other business resources.

<5G Lifestyle Support Business>

In addition to providing mobile communications services using smartphones and other devices targeting individuals and Internet-related services via fixed lines, we are promoting the provision of 5G Homestyle (Internet Services for Collective Housing). In 5G Homestyle, we are also focusing on establishing new services other than Internet services for apartment buildings.

In addition, we will develop and provide services with an eye to the future changes in lifestyles in the 5G/web3 era using "TONE", our proprietary smartphone using Maker's Maker platforms. In addition to existing businesses, we will also develop and expand new services in fields such as 5G Workstyle and 5G Healthstyle,5G Lifestyle, and 5G Carlifestyle, while "TONE" is responsible for the positioning of our group's technologies as Showroom.

<Corporate and Creator 5G DX Support Business>

We are expanding our 5G marketing-conscious services and influencer marketing. In addition to promoting Internet marketing and ad technology-related businesses with a view to web3, we are developing Bizmodel Maker that is a mechanism that allows companies that start Creator Maker and new businesses, which are platforms that allow YouTubers and other creators and influencers to spread their works, to provide services via their platforms.

In the first quarter of the fiscal year under review, despite concerns about a temporary slowdown in the pace of growth due to the slowdown in overseas economies and the impact of high prices, firm growth is expected in the domestic IT market environment. However, while 5G and web3 are expected to penetrate, their spread is still in the process of being spread. In addition, in our group, we consider it highly likely that all business areas will be affected by the emergence of disruptive technologies and changes in the market environment.

In this environment, we have positioned the current consolidated fiscal year as "Transformation Term" again. We will respond to rapid technological and other changes and reexamine our business, organizational, and human resources strategies. We will also implement effective strategic investing that effectively utilizes the Group's management resources. In this way, we will strive to establish our position as Platform Maker of "5G/web3 era" at the earliest possible time.

The operating results of each reportable segment are as follows.

① 5G Infrastructure Support Business

In the fixed-line network, the use of many services via the Internet continues to increase due to an increase in online video viewing at home and the use of rich content and SNS, including games, along with changes in working styles and lifestyles, and the generalization of online-format conferences and classes, such as the spread of telework and home-based learning. As a result, network costs remain on a high trend.

In the mobile network business, the provision of inexpensive plans by major mobile telecommunications carriers and the deployment of these plans under subbrands continue to affect the growth of proprietary MVNO service providers, but the growth of the mobile market as a whole continues and is expected to expand in the future, including the expected increase in use for IoT.

Against this backdrop, MVNE's support business for MVNO expanded and remained firm in our group.

As a result, the segment recorded sales of 2,427,530 thousand yen (up 4.3% year on year) and the segment profit of 438,45 thousand yen (up 11.5% year on year).

② 5G Lifestyle Support Business

As explained in "5G Infrastructure Support Business", network costs are rising in the fixed-line network services market, but the market for 5G Homestyle (Internet Services for Collective Housing), one of the Group's main services, is expected to steadily expand in the future as the high-speed broadband environment aimed at improving the asset value of buildings and occupancy rates is being standardized, and the use of telework, online classes, video content viewing, and other services has been recognized as standard. As a result, the market size of these services is expected to steadily expand in the future. To respond to the growing demand for high-speed communications, we have also begun offering ISP services for faster apartment buildings. In addition, as part of our efforts to realize "Smart Town" (a town where the convenience of urban infrastructures is enhanced through the use of digital technologies), we will propose new lifestyles and lifestyles in the 5G/web3 era utilizing various advanced technologies in community towns "LIVING TOWN Minato Mirai".

In 5G Lifestyle (mobile communications services for individuals and Internet-related services), we provide smartphone devices with an eye to the arrival of the 5G/web3/ metaverse era in smartphone services "Tone Mobile" utilizing the proprietary technologies offered by our group. We are also working to resolve a variety of social issues, such as the development of a watch-and-watch service for families equipped with "TONE Anshin AI" that monitors families in AI as a unique service using smartphones. We are also providing specialist counseling on the "overuse of smartphones" in the next-generation online health consulting service "TONE Care" to solve the social issue of Internet dependency, which is worldwide in danger. In order to increase the number of subscribers to "Tone Mobile", we implemented marketing measures mainly in performance-based advertising given cost-effectiveness.

As GIGAPRIZE and its subsidiaries responsible for 5G Homestyle changed their fiscal year-end in the current fiscal year, in the first quarter of the fiscal year under review, the four months from April 1, 2023, to July 31, 2023, have been included in the consolidated financial results.

As a result, the segment recorded sales of 7,600,326 thousand yen (up 38.8% year on year) and the segment profit of 1,034,418 thousand yen (up 174.4% year on year).

In addition, even a comparison of the first quarter under review estimated over the same three-month period as the first quarter of the previous fiscal year, both net sales and segment income increased from the previous fiscal year due to the smooth performance of the business itself.

③ Corporate and Creator 5G DX Support Business

In the Internet marketing and ad technology services offered by Full Speed Inc. (Full Speed), economic activity began to normalize due to the relaxation of action restrictions along with the transition to a new type of coronavirus infectious disease, and demand for advertising was also on a gradual recovery trend. In this environment, we worked to promote DX for our Internet marketing-related business by leveraging our accumulated Internet marketing expertise. We are also moving forward with initiatives for new businesses for medium-term growth. We have strengthened our efforts to expand creator economic zones in which creators make monetization through their own skills) through a platform for creators "StandAlone" that allows creators to disseminate information themselves without going through major platforms, and maximize the value of this information. We have also strengthened our provision of NFT issuance support services for creators. We also worked to improve operational efficiency and control costs by implementing PMI after making Full Speed a wholly-owned subsidiary.

As a result, the segment recorded sales of 4,668,227 thousand yen (up 15.6% year on year) and the segment profit of 197,427 thousand yen (up 104.7% year on year).

In addition, as a result of incorporating the four months from April 1, 2023, to July 31, 2023, of GIGAPRIZE and its subsidiaries into the consolidated results for the first quarter of the fiscal year under review, net sales were 14,040,063 thousand yen, operating income was 1,664,687 thousand yen, ordinary income was 1,623,744 thousand yen, and profit attributable to owners of the parent was 863,491 thousand yen.

Other	-	-5,381
Adjusted amount	-656,024	-228
Total	14,040,063	1,664,687

(2) Financial Position

Total assets at the end of the first quarter of the fiscal year under review were 35,102,907 thousand yen decreased by 823,579 thousand yen from the end of the previous fiscal year. This was mainly due to a decrease in cash and deposits of 1,471,445 thousand yen, despite an increase in notes receivable, accounts receivable and contract assets of 192,728 thousand yen, accounts receivable-other included in other current assets of 349,709 thousand yen, and lease receivables (tangible) included in other current assets of 209,176 thousand yen.

Liabilities were 23,210,268 thousand yen, a decrease of 1,683,865 thousand yen from the end of the previous fiscal year. This was mainly due to decreases in accounts payable-other by 357,229 thousand yen, income taxes payable by 280,343 thousand yen, long-term loans payable by 799,085 thousand yen, and lease obligations (non-current) by 143,447 thousand yen. Net assets increased 860,285 thousand yen from the end of the previous fiscal year to 11,892,638 thousand yen due to an increase in retained earnings, etc., and as a result, the equity ratio was 25.4%.

(3) Consolidated Results Forecasts and Other Forward-looking Information

There is no change in the full-year forecast for the fiscal year ending April 2024 from the figure announced on June 9, 2023, as the results for the first quarter of the fiscal year under review have generally remained in line with forecasts.

2. Quarterly Consolidated Financial Statements and Major Notes

(3) Notes to Quarterly Consolidated Financial Statements

(Notes regarding the going concern assumption) Not applicable.

(Notes regarding change impacting Shareholders' Equity) Not applicable.

(Changes in the scope of consolidation or application of the equity method)

Changes in matters concerning the fiscal year, etc. of consolidated subsidiaries

During the fiscal year under review, GIGAPRIZE, GIGATEC, Soft Volatile, and LTM changed their fiscal year-end from March 31 to April 30, and are the same as the consolidated fiscal year-end.

As a result of the change in the fiscal year-end, the consolidated subsidiary's fiscal year under review was four months for the first quarter under review, and the impact of the change in the fiscal year-end is adjusted through the consolidated statement of income.

The consolidated subsidiary recorded net sales of 1,731,430 thousand yen, operating income of 398,106 thousand yen, and ordinary income and income before income taxes and minority interests of 395,372 thausand yen for the period from April 1, 2023, to April 30, 2023.
